Fit Assessment: Senior Manager, GTM Strategy & Operations — Elicit Executive Search, Inc.

Deal-breakers: None confirmed, but posting company is an executive search firm — actual hiring company is unnamed, making Stage/Health assessment difficult.

Dimension	Score	Notes
A. Role Type	3/5	GTM Strategy & Ops — meaningful strategic elements but leans into RevOps execution: territory design, CRM, pipeline reviews
B. Industry	4/5	AI startup (Tier 2), though actual company is unnamed
C. Company Stage	3/5	"Hyper-growth, 3X" claimed but company identity unknown; can't verify
D. Scope & Seniority	3/5	Senior Manager title — below Director target; manages a BU but seniority is a level down
E. Compensation	3/5	Not listed; "Senior Manager" in RevOps often runs $150K–$180K, likely below floor

Role Fit Score: 3.20 / 5 — Marginal
Candidate Fit Score: 3 / 5 — Moderate — strategy/ops background fits, but SQL and GTM tools (Salesforce, Outreach, Clari) are stated requirements without clear coverage in resume.
Recommendation: Skip — marginal role fit, seniority is a step down, comp likely below floor, and actual company is unknown.

Trajectory value: Lateral or slightly down. RevOps is a narrower function than current scope; doesn't build toward GM or corp dev track.

Gaps & flags:

- 🟡 Comp likely below $200K floor for "Senior Manager" level
- 🟡 GTM tools (Salesforce, Outreach, Clari, Gong) not clearly demonstrated
- 🟡 SQL requirement — not mentioned in resume
- 🔴 Actual company is unknown — due diligence impossible

Strongest angles: Strategy + ops background from Labster fits the "strategic thought partner" framing; BizOps cadence ownership experience is relevant.

Fit Assessment: Finance & Strategy Leader — DeWinter Group

Deal-breakers: Placed by staffing firm — actual company and size unknown.

Dimension	Score	Notes
A. Role Type	2/5	Heavy FP&A / CFO-adjacent — financial modeling, investor relations, LP reporting; limited strategy mandate
B. Industry	3/5	Likely tech (Palo Alto), but unknown
C. Company Stage	3/5	Unknown company; "rapid scaling" suggests growth stage
D. Scope & Seniority	4/5	C-suite thought partner, foundational finance leader — real scope if taken at face value
E. Compensation	3/5	Not listed

Role Fit Score: 2.90 / 5 — Marginal
Candidate Fit Score: 2 / 5 — Weak — requires "expert-level financial modeling proficiency" and "7+ years in investment banking, management consulting, strategic finance/FP&A." Morten's consulting tenure was 1 year; he is not a finance specialist. This is likely a hard filter.
Recommendation: Skip — finance-heavy role that needs a career finance person. Would be screened out.

Trajectory value: Not toward GM track; this moves toward CFO/finance leadership, a narrower path.

Gaps & flags:

- 🔴 Hard gap: No deep FP&A/banking/finance career background — role requires 7+ years in those functions
- 🔴 Expert financial modeling is a stated core requirement; Morten has business modeling competency, not FP&A-grade expertise

---

Fit Assessment: Principal, Corporate Development — Amazon

Deal-breakers: None.

Dimension	Score	Notes
A. Role Type	5/5	Pure corp dev — M&A, investments, strategic partnerships. Core target.
B. Industry	4/5	Amazon Devices & Services (consumer tech, Tier 2)
C. Company Stage	3/5	Mega-enterprise; stable but specific BU focus on international consumer tech
D. Scope & Seniority	4/5	Principal level — high visibility, works with senior leadership, real deal ownership
E. Compensation	5/5	$174K–$288K base + equity; top end well above floor

Role Fit Score: 4.30 / 5 — Yes with flags
Candidate Fit Score: 3 / 5 — Moderate — real deal experience (5 LEGO Ventures investments, UbiSim acquisition, Labster divestiture + 2 funding rounds), but total deal volume is lighter than a typical Amazon Corp Dev hire who comes from an IB or PE background with 10–15+ transactions. The "first chair M&A lifecycle" preferred experience is partially met.
Recommendation: Apply with strong framing — ideally with warm intro. Cold apply to Amazon Corp Dev is a tough screen; deal experience is real but needs to be packaged tightly.

Trajectory value: Strong — corp dev at Amazon is a high-credential role and builds toward corp dev leadership or GM of a strategic function.

Gaps & flags:

- 🟡 Deal volume: 5 investments + 1 acquisition + 1 divestiture. Solid but lighter than a banker with 20+ deals
- 🟡 Preferred MBA — not held; international experience covers the other preferred qualifier
- 🟡 "International consumer technology" focus — no direct consumer tech industry experience

Strongest angles:

- LEGO Ventures: 5 investments as lead investor, including EdTech and gaming — directly analogous to corp dev at Amazon Devices
- UbiSim acquisition: full lifecycle ownership (diligence → integration → 25% synergy capture)
- Labster divestiture: active deal experience, current
- $100M fundraising: credibility with investors and deal structuring
- International background (Zurich, London, SF, Taiwan) matches the role's international focus

---

Fit Assessment: Senior Corporate Strategy Manager (Brand) — Levi Strauss & Co.

Deal-breakers: Salary ceiling $177,200 — below $200K hard floor.

STOP — automatic disqualifier. Do not apply.

Fit Assessment: Company Planning Manager — Janie and Jack

Deal-breakers: Functional mismatch; comp almost certainly below $200K floor for a retail planning manager role.

Dimension	Score	Notes
A. Role Type	1/5	Retail merchandise/financial planning — inventory, channel planning, GMROI. Not strategy or BizOps.
B. Industry	2/5	Children's fashion retail. Tier 3 industry, but role is wrong function entirely
C. Company Stage	2/5	Private retail brand, unclear growth trajectory
D. Scope & Seniority	2/5	Manager level; co-reports to IM and Finance; no strategic mandate
E. Compensation	1/5	Not listed; retail planning manager typically $80K–$130K — well below floor

Role Fit Score: 1.55 / 5 — No
Candidate Fit Score: 1 / 5 — Poor — wrong function entirely; no retail planning background.
Recommendation: Skip.

Trajectory value: None — moves away from target.

Fit Assessment: Director, Licensed Publishing — Chronicle Books

Deal-breakers: Salary ceiling $135,750 — far below $200K hard floor.

STOP — automatic disqualifier. Do not apply.

Fit Assessment: Senior Revenue Strategy & Operations Manager — Mixpanel

Deal-breakers: None confirmed; but TTCC includes variable which may be commissions — flag for verification.

Dimension	Score	Notes
A. Role Type	3/5	Revenue Strategy & Ops — strategic elements but focused on GRR/NRR, post-sales retention. Narrower than target.
B. Industry	3/5	B2B SaaS analytics (Tier 2–3 tech)
C. Company Stage	4/5	Well-funded ($277M+), established SaaS, 9K+ customers
D. Scope & Seniority	3/5	Senior Manager level — meaningful but not Director+
E. Compensation	3/5	$189K–$231K TTCC — base alone may be below $200K; unclear split

Role Fit Score: 3.15 / 5 — Marginal
Candidate Fit Score: 3 / 5 — Moderate — strategy/ops experience is relevant; but role asks for "3+ years at top-tier management/strategy consulting firm" (Morten had ~1 year at Voluntas) and "2+ years in BizOps/Sales Strategy at B2B SaaS" (partial match). The post-sales/retention focus is a function Morten hasn't specifically owned.
Recommendation: Skip — marginal fit, uncertain comp, functional focus too narrow.

Trajectory value: Lateral — GRR/NRR ownership is a specific GTM function, not building toward GM or corp dev.

Gaps & flags:

- 🟡 "3+ years at top-tier consulting firm" — Morten has ~1 year (Voluntas Advisory)
- 🟡 Post-sales retention/expansion focus — not a function he's specifically led
- 🟡 TTCC comp structure — base could be below $200K floor

Fit Assessment: Business Operations Lead — Crossing Hurdles (YC W24 CI Infrastructure Startup)

Deal-breakers: None — but base floor of $170K is below $200K preference. Flag for negotiation.

Dimension	Score	Notes
A. Role Type	5/5	BizOps Lead — first ops hire, CEO proximity, strategic and financial ownership. Core target.
B. Industry	4/5	Dev infrastructure / AI-adjacent tech (Tier 2)
C. Company Stage	5/5	YC W24, $13.5M (GV-backed), $8M→$30–40M ARR target. Rapid growth, clear PMF.
D. Scope & Seniority	4/5	First hire, CEO proximity — outsized scope for the title
E. Compensation	3/5	$170K–$210K base + equity. Range straddles floor; risk of landing below $200K

Role Fit Score: 4.30 / 5 — Yes with flags
Candidate Fit Score: 4 / 5 — Strong — LEGO Ventures + Labster BizOps + "4+ years in startups and analytical roles in finance or consulting" checks out cleanly. Startup operator experience at Labster (scaling + restructuring) is directly relevant.
Recommendation: Yes — apply and negotiate. If base can reach $200K or equity is compelling, this is a strong opportunity. CEO proximity and rapid growth trajectory are exactly the environment preferences describe.

Trajectory value: High — first BizOps hire at a hyper-growth YC company is a resume-building role; positions well for Head of BizOps / COO / GM track.

Gaps & flags:

- 🟡 Comp floor of $170K — negotiate to $200K+ or confirm equity offset
- 🟡 Role is titled "Lead" not Director — may be below target seniority on paper

Strongest angles:

- First BizOps hire at a comparable stage (built Labster's strategy/ops from scale → restructuring)
- Analytical + finance background (LEGO Ventures investing, Labster FP&A oversight)
- Series B prep context: Morten has led two funding rounds ($100M total) — directly relevant as company prepares for Series B

Fit Assessment: National Business Development Director — McLane Company

Deal-breakers: (1) Comp ceiling $160K base — below $200K hard floor. (2) Travel 75% — well above monthly+ yellow flag threshold. (3) JD describes clear pipeline/sales role with cold calling, prospecting, CRM tracking.

STOP — multiple automatic disqualifiers. Do not apply.

Fit Assessment: Corporate Development Manager — SecurityScorecard

Deal-breakers: None confirmed, but NYC HQ with SF Bay Area posting — verify work location is actually SF hybrid, not NYC hybrid.

Dimension	Score	Notes
A. Role Type	5/5	Corp dev — M&A, strategic investments, alliances, integration. Core target.
B. Industry	3/5	Cybersecurity SaaS — growing sector but Tier 3 for Morten
C. Company Stage	4/5	Well-funded (Silver Lake, Moody's, Sequoia, GV), global leader in its space
D. Scope & Seniority	3/5	Manager level — end-to-end deal work but a level below target seniority
E. Compensation	3/5	$160K–$200K base + bonus + equity. Tops out at $200K; straddles floor

Role Fit Score: 3.75 / 5 — Yes with flags
Candidate Fit Score: 4 / 5 — Strong — "2+ years in corp dev, IB, PE/VC, strategy, consulting" is clearly met; M&A and strategic partnership execution is directly demonstrated. Morten likely overqualified for Manager level but the JD's scope is real.
Recommendation: Yes with flags — apply if confirmed SF-based. The role is a level below target, but corp dev experience at a credible company is valuable and may be structured for rapid promotion given his background.

Trajectory value: Builds corp dev credentials in a new sector; manageable stepping stone if it leads to a Director role within 12–18 months.

Gaps & flags:

- 🔴 HQ is New York City — confirm this posting is genuinely SF-based, not NYC hybrid
- 🟡 Manager title is a level below target seniority — could negotiate title or confirm promotion path
- 🟡 Comp tops at $200K base; may not clear floor with meaningful buffer
- 🟡 Cybersecurity domain — no direct background; needs to build credibility on strategic fit

Strongest angles:

- LEGO Ventures: 5 investments as lead, full diligence lifecycle
- UbiSim acquisition + Labster divestiture: end-to-end M&A execution
- Strategic alliances: two GTM partners signed at Labster
- AI fluency requirement: explicitly listed — advantage over traditional finance profiles

---

Fit Assessment: Manager, Strategy and Business Operations — Helix

Deal-breakers: Salary ceiling $148,000 — far below $200K hard floor.

STOP — automatic disqualifier. Do not apply.

Fit Assessment: Director, M&A Integration — Cadence

Deal-breakers: None confirmed.

Dimension	Score	Notes
A. Role Type	4/5	M&A Integration Director — adjacent to corp dev; real strategic mandate, C-suite visibility
B. Industry	3/5	Semiconductor EDA software — Tier 3, but respectable enterprise tech
C. Company Stage	3/5	Large established enterprise (Cadence is profitable and stable, not declining)
D. Scope & Seniority	4/5	Director level, reports to VP; cross-functional team leadership; C-suite engagement

E. Compensation	4/5	Not stated; Cadence Director-level roles typically $220K–$300K+ base + equity. Assume competitive — flag for confirmation

Role Fit Score: 3.65 / 5 — Yes with flags
Candidate Fit Score: 3 / 5 — Moderate — UbiSim integration is real and well-documented (25% synergy savings, 40%+ revenue CAGR post-close). But Cadence would typically want someone who has led multiple integrations at a consulting firm or in-house corp dev, ideally in software. One acquisition is a gap against a peer with 5–10 integrations.
Recommendation: Conditional — apply with a warm intro if possible. Cold apply is viable but the integration track record is thin for what Cadence will expect at Director level. Worth a shot given comp and seniority alignment.

Trajectory value: Builds M&A integration credentials — a specific and valuable toolkit for future corp dev leadership or GM of acquired entity.

Gaps & flags:

- 🟡 Integration track record: 1 acquisition (UbiSim) vs. typical expectation of multiple
- 🟡 "Preferably in the software field" — Labster/UbiSim is EdTech SaaS, which maps reasonably
- 🟡 MBA preferred — not held
- 🟡 No comp listed — verify before advancing

Strongest angles:

- UbiSim integration: full end-to-end ownership including 25% synergy capture and 40% ARR CAGR — quantified outcomes
- Cross-functional leadership across product, engineering, GTM at Labster
- LEGO investment experience gives strategic context for evaluating acquisition targets
- Strong executive communication credentials (board-level reporting, C-suite alignment)

Fit Assessment: Director, Corporate Strategy — Levi Strauss & Co.

Deal-breakers: None.

Dimension	Score	Notes
A. Role Type	5/5	Director of Corporate Strategy — core target, direct VP/CEO's Office exposure
B. Industry	2/5	Apparel/consumer goods (Tier 3) — no direct background

C. Company Stage	3/5	Large established enterprise (170-year-old brand) undergoing DTC pivot — stable, not declining
D. Scope & Seniority	4/5	Director level, works directly with VP Strategy + CEO's Office; high visibility, real mandate
E. Compensation	4/5	$200K–$245K base — at floor to well above floor

Role Fit Score: 3.75 / 5 — Yes with flags
Candidate Fit Score: 3 / 5 — Moderate — meets all core requirements (8+ years, strategy background, executive-level work). Missing: consumer/retail/apparel industry experience (listed as a plus but will be a visible gap). MBA preferred but not required.
Recommendation: Yes with flags — apply. The functional fit is strong; the industry gap is real but framed correctly (B2B SaaS → DTC/consumer is a stretch, but cross-industry strategy is the explicit sell).

Trajectory value: Strong for credentials — a Director of Corp Strategy role with CEO's Office access at a major brand is resume-building. But apparel is Tier 3; stay eyes-open on industry direction.

Gaps & flags:

- 🟡 No consumer/retail/apparel experience — the "plus" becomes a visible differentiator against candidates who have it
- 🟡 MBA preferred — not held
- 🟡 Levi's is a large enterprise; GM or growth-stage ownership won't come from this role directly

Strongest angles:

- 8+ years of strategy leadership at VP level — meets the seniority bar cleanly
- DTC pivot / transformation context: Labster went through a major transformation (450→150 employees, shift to profitability); mirrors Levi's DTC evolution
- Cross-functional initiative leadership: OKRs, strategic planning, quarterly business reviews — directly applicable
- Board-level communications and investor relations experience — valued at the executive level

---

Fit Assessment: Vice President Finance — 3 Bridge Networks (PE/VC Firm)

Deal-breakers: None confirmed, but functional mismatch is severe.

Dimension	Score	Notes

A. Role Type	1/5	Fund finance/accounting — LP reporting, carried interest, fund structures, audit. Not strategy.
B. Industry	2/5	PE/VC financial services — adjacent to investment background but wrong function
C. Company Stage	3/5	Established fund with strong track record
D. Scope & Seniority	3/5	VP title, but it's a finance/accounting scope not a business leadership scope
E. Compensation	3/5	Not stated

Role Fit Score: 2.20 / 5 — No
Candidate Fit Score: 1 / 5 — Poor — "10+ years in PE/VC accounting" and "CPA strongly preferred" — completely mismatched background. LEGO Ventures was investing, not fund accounting.
Recommendation: Skip.

Fit Assessment: Marketing Director — Nibbi Brothers General Contractors

Deal-breakers: None on paper, but functional and industry mismatch is decisive.

Dimension	Score	Notes
A. Role Type	2/5	Marketing Director for a GC — proposal management, RFP/RFQ leadership, AEC branding. Not strategy or BizOps.
B. Industry	2/5	Construction/AEC — no background
C. Company Stage	2/5	Established company, not growth-stage tech
D. Scope & Seniority	3/5	Director level with team management

E. Compensation	4/5	$175K–$250K — competitive range

Role Fit Score: 2.50 / 5 — No
Candidate Fit Score: 1 / 5 — Poor — "10+ years of marketing and proposal leadership experience in construction, engineering, or professional services" is a hard industry requirement. Morten has no AEC marketing background.
Recommendation: Skip.

Fit Assessment: Director of Operations — Truex Métier (Family Office)

Deal-breakers: None on paper, but role is operationally and functionally mismatched at a fundamental level.

Dimension	Score	Notes
A. Role Type	1/5	Family office ops including household management, travel logistics, vendor coordination — EA/COO hybrid for a principal
B. Industry	1/5	Family office — not a company, no product, no growth trajectory
C. Company Stage	3/5	N/A (family office)
D. Scope & Seniority	2/5	Manages scheduling, vendors, household — well below target scope
E. Compensation	3/5	$150K–$200K; tops at floor

Role Fit Score: 1.80 / 5 — No
Candidate Fit Score: 1 / 5 — Overqualified and wrong function entirely.
Recommendation: Skip — this is a high-end EA/COO role for a family, not a business leadership role.

Fit Assessment: Senior Manager, Business Development (EMS/AI Data Center) — Tata Electronics

Deal-breakers: None explicitly, but role is effectively a sales/BD role in a niche manufacturing vertical.

Dimension	Score	Notes
A. Role Type	2/5	Sales/BD for EMS manufacturing — securing OEM contracts, pipeline management, CRM updates. Not corp strategy.
B. Industry	2/5	Electronics manufacturing services — Tier 3, no background
C. Company Stage	3/5	Tata Group (large, stable) with greenfield growth ambitions
D. Scope & Seniority	3/5	Senior Manager — some scope but functional mismatch
E. Compensation	3/5	Not stated

Role Fit Score: 2.50 / 5 — No
Candidate Fit Score: 1 / 5 — Poor — requires "Strong background in AI data center, compute, and cloud infrastructure ecosystem" and "Proven success selling complex EMS solutions." Zero industry background.
Recommendation: Skip.

Fit Assessment: Business Development Manager/Sr. Manager — SK hynix America

Deal-breakers: Comp ceiling $180,000 — below $200K hard floor.

STOP — automatic disqualifier. Do not apply.

Fit Assessment: General Manager — Typhur Robotics

Deal-breakers: Fluent Mandarin Chinese is a hard requirement ("must be able to operate in both languages with U.S. teams and China HQ"). If Morten does not speak Mandarin, this is a disqualifier.

Dimension	Score	Notes

A. Role Type	5/5	U.S. President & GM — full P&L, GTM, marketing, sales, CX, ops. The dream role.
B. Industry	4/5	Consumer hardware/robotics — Tier 2 (consumer tech)
C. Company Stage	4/5	China-backed growth-stage consumer hardware company expanding in the U.S.
D. Scope & Seniority	5/5	Full U.S. P&L owner — the highest possible scope
E. Compensation	5/5	$300K–$500K — exceptional

Role Fit Score: 4.65 / 5 — Strong Yes (role fit only)
Candidate Fit Score: 2 / 5 — Weak — missing: (1) Mandarin Chinese (likely a hard dealbreaker), (2) Amazon marketplace / DTC / consumer e-commerce experience (hard requirement — "at least two of" the three core channels), (3) 12+ years in consumer/e-commerce leadership. EdTech SaaS GM experience doesn't directly translate to D2C consumer hardware.
Recommendation: Skip unless Morten speaks business-level Mandarin. If he does, this becomes a top-priority application but requires significant framing work on the consumer/e-commerce gaps.

Trajectory value: The highest-trajectory role in the batch — but inaccessible without Mandarin and consumer experience.

Gaps & flags:

- 🔴 Mandarin Chinese requirement — if not fluent, this is a hard no
- 🔴 No Amazon marketplace / DTC / retail channel experience — hard requirement
- 🔴 12+ years in consumer/e-commerce — background is B2B SaaS EdTech, not consumer

---

Fit Assessment: General Manager — Stuart Dean Company

Deal-breakers: None confirmed, but industry experience is listed as a hard requirement ("minimum 5 years in building services...commercial real estate, construction management"). Comp also likely below $200K floor for a local office GM in building restoration services.

Dimension	Score	Notes
A. Role Type	5/5	True GM — full P&L, team leadership, client relationships, business development for a local office

B. Industry	2/5	Building services / architectural restoration — no background
C. Company Stage	2/5	Established 1940s company in a mature, services-based industry — not growth-stage tech
D. Scope & Seniority	4/5	Full SF office P&L ownership — real GM scope
E. Compensation	3/5	Not stated; building services GM in SF likely $150K–$200K base with bonus — straddles floor

Role Fit Score: 3.45 / 5 — Yes with flags (role fit only)
Candidate Fit Score: 2 / 5 — Weak — "minimum 5 years in building services, commercial real estate, or construction management" is a stated hard requirement with no adjacent experience in Morten's background.
Recommendation: Skip — industry hard requirement is likely enforced; comp probably below floor; wrong sector for career trajectory.

Trajectory value: Moves away from tech/growth path. Running a building services office doesn't build toward GM/CEO at a growth company.

Summary: Inbox Assessment Results

Role	Company	Role Fit	Candidate Fit	Verdict
Principal, Corp Dev	Amazon	4.3 — Yes 🚩	3/5	Apply (warm intro preferred)
Biz Ops Lead	Crossing Hurdles (YC)	4.3 — Yes 🚩
